MEANING OF THE AURA COLORS

Violet: You are the fairy or leprachaun person of the color spectrum. "magical" would best describe your life and your way of operating the world at this point. You would rather talk about miracles, magic, and pots of gold at the end of the rainbow rather than anything ordinary or mundane. You would rather focus on the ethereal and the sublime. The beautiful world of the imagination is where you are safest and happiest. You create a magical environment to live in. Your psychic abilities are also strong and fine-tuned now.

White: "Peace, Loving, and Balancing" best describe your focus in life now. You are natural, clear conduit for spiritual balancing energy for others as well as yourself. This energy indicates you are in a regenerative, restful phase. If you do not work in the energy-balancing arts, you may find yourself gently encouraging and nurturing others with just your mere presence. Presently, your highest goals are to achieve complete inner peace and to develop your relationship with the Creator.

Blue: At this point in time, you are experiencing deep inner peace and tranquility in your life. Above all, you want to create harmony and ease in your environment. You may be on vacation or just experiencing a "time out" to relax and gather your energies. If you meditate, you may be able to easily access blissful states of consciousness. Your spirituality, rest, and peace are your main focus now.

Green: "Hard at work" would best describe you now. You have serious goals, and you live your life in an organized, deliberate, and economical fashion. You are ambitious and desire prestige, notoriety, and power. You are also full of compassion and can be just as generous as you are demanding. You may be an excellent teacher, counselor, or business owner. You are full of gentle strength.

Yellow: Joy and happiness surround you now. Your excitement is contagious, life is your playground, and you make everything fun. Even the most tedious of household tasks becomes a game when you do them because you infuse everything with a sense of fun. At heart you are a happy, laughing child. You also have a bright and curious intellect hungry for new and exciting ideas.

Orange: You can't help expressing yourself creatively! You are an artist at heart and march to the beat of a different drummer. Right now, you are feeling powerful. You have energy, enthusiasm, confidence, and will to accomplish anything you desire. This is a time to "go for it." If you have any original ideas or creative projects in mind, you need to begin them now! Orange is also the color of originality and independence.

Red: At this time, you are experiencing a time of challenge with an action-packed schedule, barely leaving you time to breathe, let alone sleep. You have a lot to do, and you have the energy and power to move mountains at this point in your life. You may find yourself acting as a dynamic leader or find yourself in the limelight or the center of attention. You are definitely being noticed. You have so much energy you sometimes don't know what to do with it. You may exhaust the people around you with your incredible enthusiasm.

YOUR AURA Chakra REPORT interpretation

WinAuraStar gives you a detailed report on chakra sizes, chakra color and chakra shapes. On the next pages you will see a detailed explanation for every chakra. First you will get general information about chakras, their location and their assignment to colors, music, senses and gemstones. The functions of the chakras are explained in detail.

Then there is a display of your personal chakra - its shape and color as well as its size in percentage.

SHAPES

The ideal chakra shape is round like a circle. This indicates a balanced chakra. If it is not symmetrical this might indicate an imbalanced chakra.

COLOR

The resonant color for each chakra is displayed. This color may vary according to your personal energy level. It can be lighter or darker. Light colors indicate that you project your energy outwards while dark colors tell you that you draw the energy inwards. Lightness and darkness can also be indicators for positive harmony or negative stress.

SIZE

The chakra size indicates your activity in the fields connected to the chakras. A large chakra (75-100%) indicates a high level of energy in the specific chakra and supports all matters connected to that chakra. Medium sized chakras show a normal activity (40-75%). Small chakras show little energy in the chakra and the connected areas in your life (less than 40%).

Please refer to the general chakra descriptions for more information about chakras and how they are connected to personal fields in your life.

WinAuraStar Aura Report

ROOT (Material connection): The root chakra deals with questions of survival and your will to live as well as with the question of material connection to earth and security. The link to the physical body is reflected here.

NAVEL (Needs of life and adjustment): The navel chakra represents the consciousness of basic needs for living (sexuality and food). It also represents your ability of adjustment to conditions and circumstances of daily life. You can see here the general ability to perceive, observe, compare and adjust oneself.

SOLARPLEXUS (Self-Confidence): The solarplexus chakra represents the personality of the own ego and the vibration of your very being. It has to do with control, power and freedom. Here is the center of self-confidence.

HEART (Empathy): The color of the HEART chakra represents your energy in relation to connection, affinity, compassion and empathy. How you feel about yourself and others is reflected here. If you feel intense for someone or something the energy will be very strong here.

THROAT (Creative Expression): The throat chakra shows how you communicate with your environment and how you express your creativity. Communication and expression are not only verbal expression but also the physical, emotional and creative expressions of your ego. It also signifies your sensual ability to perceive.

THIRD EYE (Spiritual vision): The third eye indicates your spiritual vision, intuition and psychic abilities.

CROWN CHAKRA (Spiritual connection): The crown chakra indicates your connection to the higher realms and your ability to transcend this world.

Seven Chakras Bar Graph

The bar graph about the seven chakras mainly shows the size of the chakras and their color variation. Usually those chakras will expand in size which correspond to the colors you have in your aura field. So if you have much red or orange in your aura field the first root and the second sacral chakra will expand in size. If you have much violet or blue the top chakras will expand their size. If a chakra is large or small in size this indicates that all fields in your life which are connected to that chakra are important or play only a little role. The second aspect in this bar graph is the rough tendency of color variation of the single chakras. Usually the chakras have a resonant color. The resonant color starts with red at the root chakra and follows the colors of the rainbow to violet and magenta at the crown chakra. These resonant colors mainly show the base frequency of the chakras. This base frequency is not always the same but can vary about one to three steps in the order of the rainbow colors. Red might turn to red-orange or orange. Yellow can be yellow green or even go to green or might have a tendency to the other side to gold or orange. This is showed by the rough color variety of the bar graph for each chakra to which color the chakra tends to. The exact color variety can be seen best in the display of the chakras and their vertical chakra bars from 0 to 100 % which have color gradients which go from the base frequency at the bottom to the color variation of the chakra at the top (as seen in the printout and on the screen).
